

Raising the agentic rate moves the agentic class's cost fourfold, the other classes' by about 1%

(a) Miss ratio of each class as the agentic offered rate rises from 12 to 36 req/s. (b) Marginal origin cost of the exhaustive class as its own volume rises.

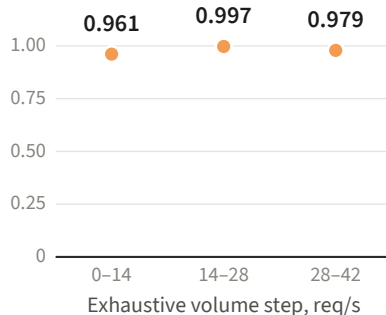

a Agentic rate, 12 → 36 req/s

Miss ratio, log scale

b Exhaustive volume, 0 → 42 req/s

Origin requests per added request

Secondary series: shared mapping, 1,211 s window, 3 repetitions

Source: Undertow testbed. (a) separated reachable sets, mean of 5 repetitions. (b) secondary series of 16 Sep 2026: shared mapping, 1,211 s window, mean of 3 repetitions, whiskers ± 1 SE.
