

What an extra agentic request costs the origin depends on its reachable set

Origin requests caused by each added agentic request, at three reachable-set sizes. Traffic volumes, cache and corpus are held fixed; only the reachable set changes.

Source: Undertow testbed, mean of 5 repetitions per row, whiskers $\pm$ 1 SE; agentic load raised from 12 to 36 req/s. Honeypot agents: public measurement site, p90 of distinct objects per 143 s window, 12 Aug – 21 Sep 2026.
