

## Raising the agentic rate moves the agentic class's cost fourfold, the other classes' by about 1%

(a) Miss ratio of each class as the agentic offered rate rises from 12 to 36 req/s. (b) Marginal origin cost of the exhaustive class as its own volume rises.

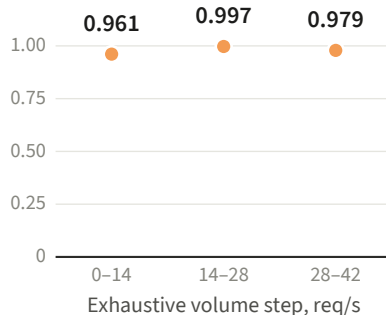

**a** Agentic rate, 12 → 36 req/s

Miss ratio, log scale

**b** Exhaustive volume, 0 → 42 req/s

Origin requests per added request
